

Project Description Assignment

This submittal should describe what your Android project intends to do. It needs to be 4-6 paragraphs in length (2 pages single spaced) and describe the following:

1. Start with a title page. Include on the title page the following:
 - a. Group Project description Title
 - b. Course number
 - c. Group Name and Number
 - d. Names of group members
2. Next page, app title. Then describe the app your team has chosen to design and build. That is, identify what problem is trying to be solved with this app? In other words, why does this app exist?
3. What the software will do - what functions it provides - describe this from a user perspective in a list format by function. A half dozen functions may be fine, depending on your app. Describe in a format as follows:
 - a. Function 1 - give a name and brief description of this function and what role uses it
 - b. Function 2 - give a name and brief description of this function and what role uses it
 - c. Function 3 - give a name and brief description of this function and what role uses it
 - d. Function 4 - give a name and brief description of this function and what role uses it
4. Identify what other resources will be utilized: wireless, GPS, databases, services.
5. Describe the experience level of the team in terms of Android. Identify each team member and provide a 100 word or less description of their experience level with Android development, use of the language (e.g., java), and any prior app development experience. Can provide in paragraph or bullet format.

We will use this project description to develop the requirements and design for your group's Android app project next.
